

Why choose us?

Advantages of Steps Material

- Global layout, continuous expansion
- One to one exclusive customer service
- Self-built 2000m² sample exhibition hall
- Integrated industry and trade, continuous product innovation

Premium Interior began its official journey on June 11, 2019, after building strong client relationships since 2016. Based in Gulshan-2 with a dedicated design studio on Level 06, we specialize in premium building materials and complete interior solutions for modern residential and commercial spaces.

Over the last 9+ years, we've built a unified team of architects, engineers, graphic designers, project managers, skilled labor, and contractors—delivering excellence in design consultancy, turnkey execution, retrofitting, civil construction, project supervision, and space planning.

Our philosophy is simple: to provide high-quality, professional, and cost-efficient services from concept to completion, transforming everything from small design tasks to large-scale renovation projects.

SOFT STONE

- The perfect combination of flexibility and natural beauty

Soft stone is a unique wall decoration material that combines the texture of natural stone with the flexibility of modern technology. It not only retains the natural texture of the stone, but also has the characteristics of lightweight and bendable, allowing you to design freely and easily realize various creative ideas. It is suitable for homes, commercial spaces, and even irregular building surfaces, showcasing infinite decorative possibilities.

- Product name:** S-Soft Stone
- Product features:**
- 1. Authentic Stone Texture:** Preserves natural stone veins with realistic touch, each piece is unique
 - 2. Ultra-Thin & Flexible:** 1-3mm thickness bendable (R=5cm) for curved surfaces
 - 3. Extreme Lightweight:** Only 1.5kg/m², 1/10 weight of natural stone, reduces structural load
 - 4. Eco-Friendly & Non-Toxic:** Zero formaldehyde/VOC, SGS certified, safe for children's rooms
 - 5. Installation Revolution:** Directly adhesive-bondable / bendable / cuttable

GOOD PRODUCTS COLLECTION 25

A fashion item loved by niche designers, belonging to their unique taste. The popular material in the design circle has different effects under different light, environment and angles, creating a sense of space with excellent performance. It is widely used by designers in architecture, interior decoration, landscape, art installation and other fields.

ULTRA THIN STONE 02

▪ Real Stone. Zero Weight. Infinite Possibilities.

Ultra-thin flexible natural stone. Ultra thin stone veneer material composed of 100% natural stone surface and backboard. The texture is strong, flexibility is good and good decorative effect with light transmission for certain series available. Light weight, easy to install and transportation.

Product Name: P Ultra Thin Stone

Product Features:

- 1. Genuine Stone Essence:**
100% natural stone slices with intact geological veins and crystalline luster
- 2. Extreme Thin & Light:**
Just 1-2mm thick (1/10 of traditional stone), weight $\leq 1.6\text{kg/m}^2$
- 3. Installation Breakthrough:**
Adhesive installation (no steel framework), 80% faster construction
- 4. Eco-Conscious:**
1m³ stone block produces 20m² ultra-thin sheets

ART CEMENT BOARD 03

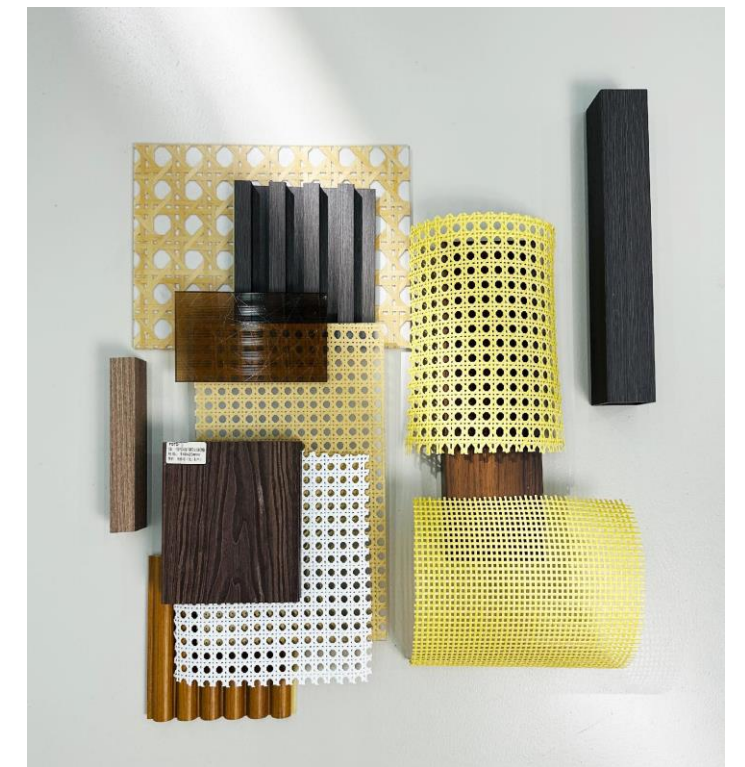

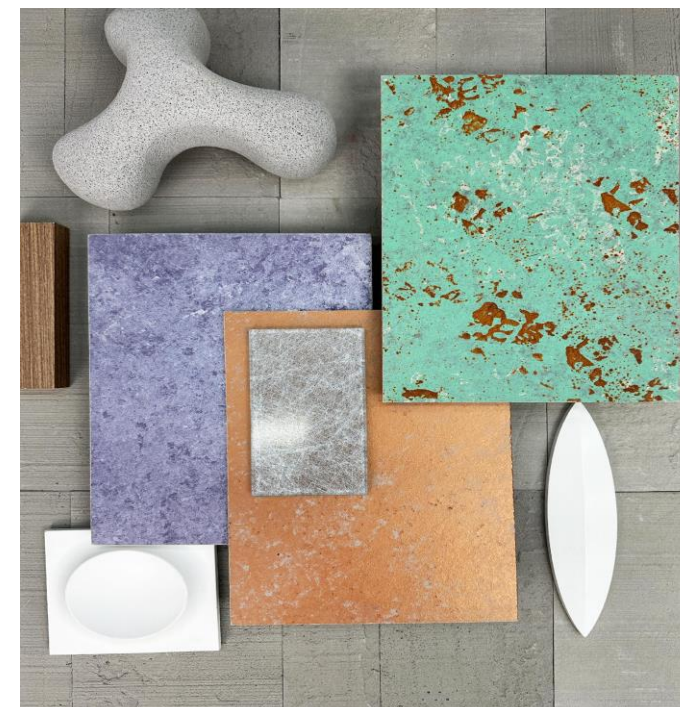

▪ Casting Art Into Every Surface.

Artistic casting panels are decorative boards crafted through special techniques, seamlessly blending colors, textures, and functionality to add unique artistry to spaces.

Product Name: Art Cement Board

Product Features:

1. Lightweight, easy to install & low maintenance
2. Eco-friendly, safe for indoor/outdoor use
3. High strength, pressure-resistant & wear-proof
4. Customizable patterns & colors

PLASTIC RATTAN 04

▪ Plastic Rattan — Nature's Look, Modern Strength.

Plastic Rattan is an innovative eco-friendly synthetic vine material crafted from high-grade polymers. It authentically replicates the texture and appearance of natural rattan while offering superior weather resistance and malleability, making it perfect for outdoor furniture and decorative applications.

Product Name: Plastic Rattan

Product Features:

- 1. Weather-resistant:** UV-proof, mold-resistant, stable from -30°C to 80°C
- 2. Eco-friendly:** 100% recyclable, heavy-metal free
- 3. High fidelity:** Perfectly mimics natural rattan texture
- 4. Easy maintenance:** Refresh with water rinse

ULTRA-CLEAR MIRROR BOARD

• Ultra-clear Mirror Panel — Reflecting Pure Luxury.

Ultra-clear Mirror Panel is a high-gloss, high-reflectivity decorative board with a smooth, mirror-like surface. It is widely used in high-end commercial spaces, home décor, and artistic designs, creating a modern and luxurious visual effect.

Product Name:

Product Features: Electroplating Brick

1. Mirror Metallic Finish: Nanoscale electroplating achieves 98% reflectivity
2. Extreme Wear Resistance: 5x more scratch-resistant
3. Anti-Fingerprint: Special oleophobic coating reduces fingerprints by 90%

BAMBOO CHARCOAL FIBER BOARD

- Healthy and environmentally friendly revitalizing home experience

Bamboo charcoal fiber board is an innovative eco-friendly building material made from natural bamboo charcoal powder and polymer composites. It features air purification, humidity regulation, mold resistance, and antibacterial properties, while being lightweight, durable, and easy to install—an ideal decorative material for modern homes and commercial spaces.

Product Name: Bamboo Charcoal Fiber Board - PET Metallic Finish

Product Features :

1. Effectively adsorbs formaldehyde and odors, purifying the air
2. Moisture-proof, mold-resistant, and warp-free
3. 100% natural and eco-friendly, zero formaldehyde added
4. Lightweight and easy to install, suits various décor styles

FRP CEMENT BOARD

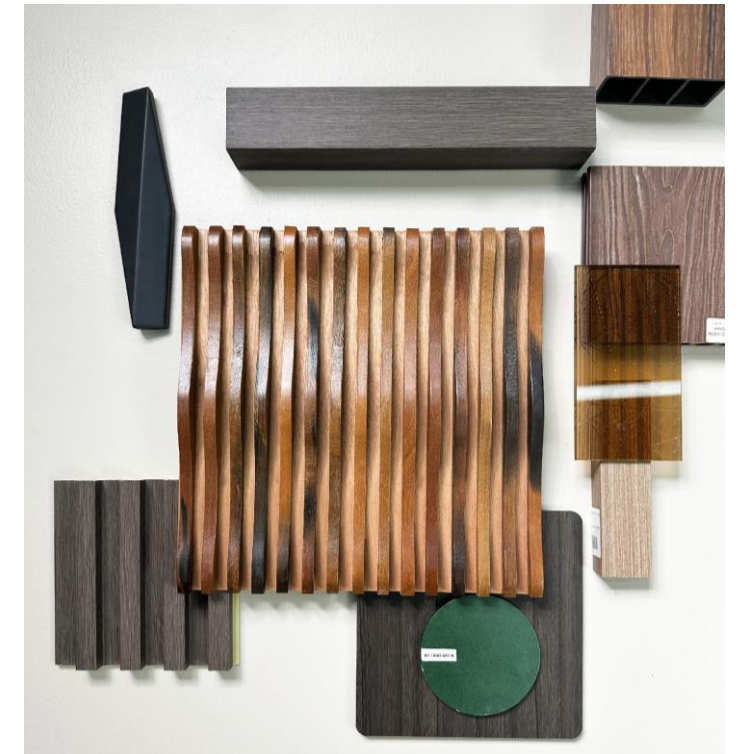

- Shape Creativity. Strengthened by FRP

FRP material is composed of glass fibre, resin, stone powder and other composite materials, through rubbing, mould opening, sizing, moulding, colouring, forming and other processes, to form a highly creative decorative performance effect. FRP products: toughness is better than cement products, can do 45° radian.

Product Name: FRP cement board

Product Features:

1. Ultra-high strength: Impact-resistant, load-bearing, and bend-proof.
2. Corrosion-proof: Resists chemicals, moisture, and rust for harsh environments.
3. Lightweight: 1/3 the weight of concrete, reducing structural stress.
4. Fire-resistant: Class A fire rating for safety compliance.
5. Customizable: Moldable for complex shapes and textured finishes.

SOLID WOOD MOSAIC

- Wood Mosaic — Nature Crafted into Art.

Wood mosaic is crafted by cutting and assembling natural wood pieces, preserving the wood's original grain and warm texture. The delicate arrangement creates unique patterns that bring natural, warm decorative effects to spaces, suitable for various applications like walls, floors, and furniture surfaces.

Product Name: Solid Wood Mosaic

Product Features :

1. Natural & Eco-friendly: 100% solid wood, formaldehyde-free, safe and healthy.
2. Warm Texture: Natural wood grain and touch create a cozy atmosphere.
3. Durable & Stable: Dried and anti-corrosion treated for better deformation resistance and moisture-proof performance.
3. Design Flexibility: Customizable with various woods (walnut, oak, teak, etc.) and pattern designs.

METAL MOSAIC

21

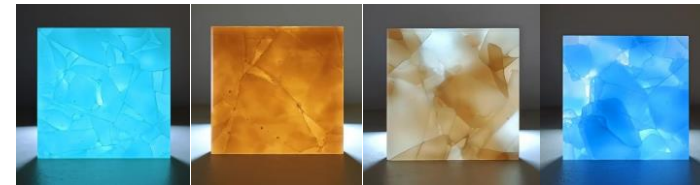

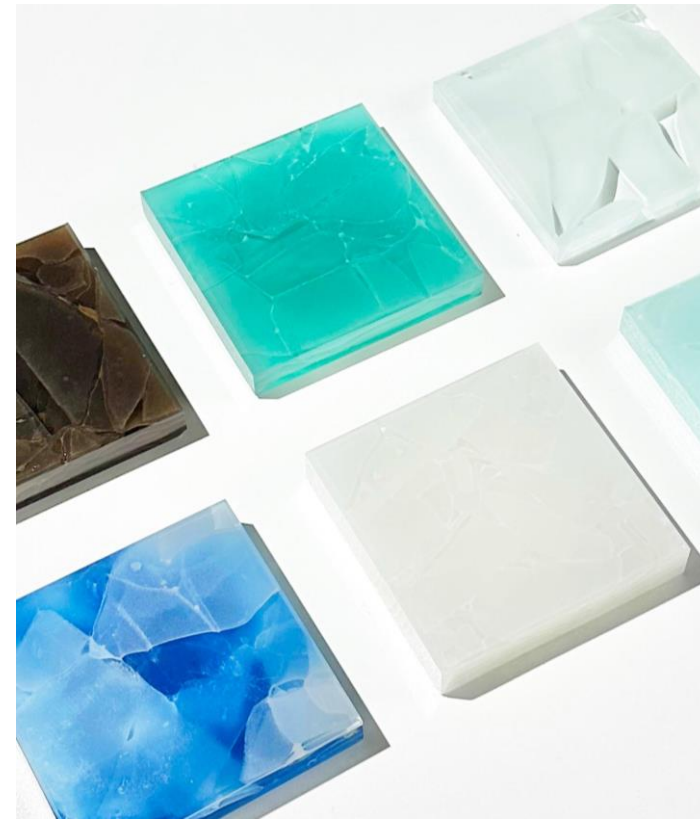

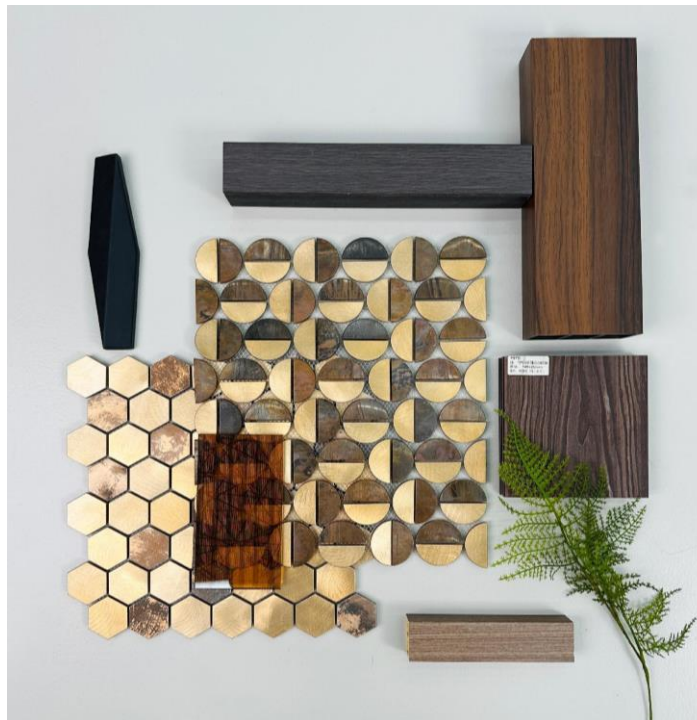

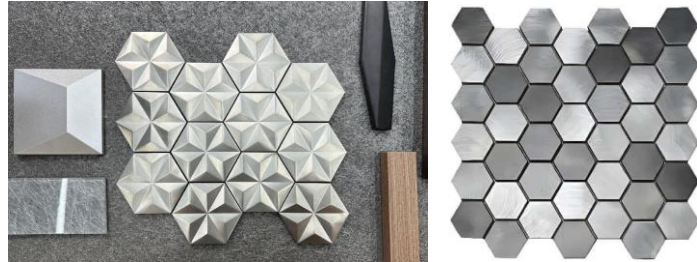

▪ Metal Mosaic — Art That Shines with Strength.

Metal mosaic is a kind of decorative material made by stitching small pieces of metal material together, which has a unique luster and texture, and can bring a modern and artistic atmosphere to the space.

Product Name: Metal Mosaic

Product Features

- 1. Modern & Luxurious:** Metallic sheen adds a sleek, avant-garde look, perfect for luxury or industrial styles.
- 2. Durable & Corrosion-Resistant:** Made of stainless steel, aluminum, or copper, resistant to rust and oxidation.
- 3. Fireproof & Waterproof:** Non-combustible and moisture-proof, ideal for kitchens, bathrooms, and high-humidity areas.
- 4. Highly Customizable:** Can be cut into various shapes (square, hexagon, wave, etc.) for unique designs.

JADE GLASS

06

▪ Where Jade's Beauty Meets Modern Light.

Jade Glass combines the beauty of natural jade with modern craftsmanship. Its smooth texture and unique patterns provide soft translucency, adding elegant artistry to any space. Perfect for feature walls, partitions, and counters—blending aesthetics with functionality.

Product Name: Jade Glass

Product Features:

- 1. Rare Jade Veining:** Authentically replicates Hetian jade/jadeite textures
- 2. Light-Transmitting Privacy:** 40-70% light transmission with soft diffusion (5-20mm thickness)
- 3. Premium Hardness:** Mohs 6.5-7.2 hardness, 3x more scratch-resistant than regular glass.
- 4. Lightweight & Safe:** 1/5 weight of solid jade, tempered for safety
- 5. Cross-Industry Application:** For facades/luxury furniture/art installations/showcases

CRYSTAL TILE

07

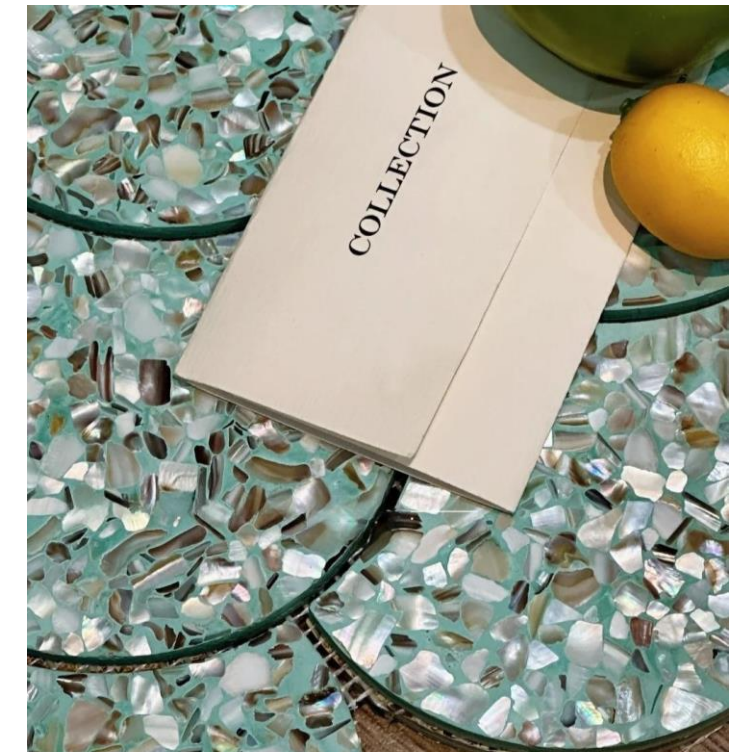

▪ Where Light Becomes Art.

Crystal Brick, crafted from high-transparency materials, shines like natural crystal. Balancing light transmission and privacy, it creates dreamy light effects—ideal for partitions, walls, and art decor, adding a luminous touch to modern designs.

Product name: : Crystal Tile

Product features:

- 1. Artistic Optical Effects:** Custom facet cutting creates prismatic light effects
- 2. Modular Design:** limitless configurations
- 3. Fireproof & Weather proof:** A1 fire rating, stable from -30°C~120°C
- 3. Eco-Material:** 100% recyclable mineral materials, heavy-metal free

SHELL MOSAIC

20

▪ Natural Shell — Where Ocean Beauty Meets Design.

Made of natural shells, it has a unique luster and beauty by cutting, polishing, splicing and other processes to bring out the natural texture and colour of the shells.

Product Name: Shell Mosaic

Product Features:

- 1. Environmental friendliness:** Shells are natural materials, do not contain harmful chemicals, and the production process will not cause pollution to the environment.
- 2. Durability:** Shell itself has a certain strength and corrosion resistance, after processing, its surface is smooth, easy to clean, not easy to discolour. Elegant and beautiful: The natural colour and texture of shells are varied, reflecting light with a unique luster, bringing a natural and elegant temperament to the space.

DIAMOND MOSAIC

19

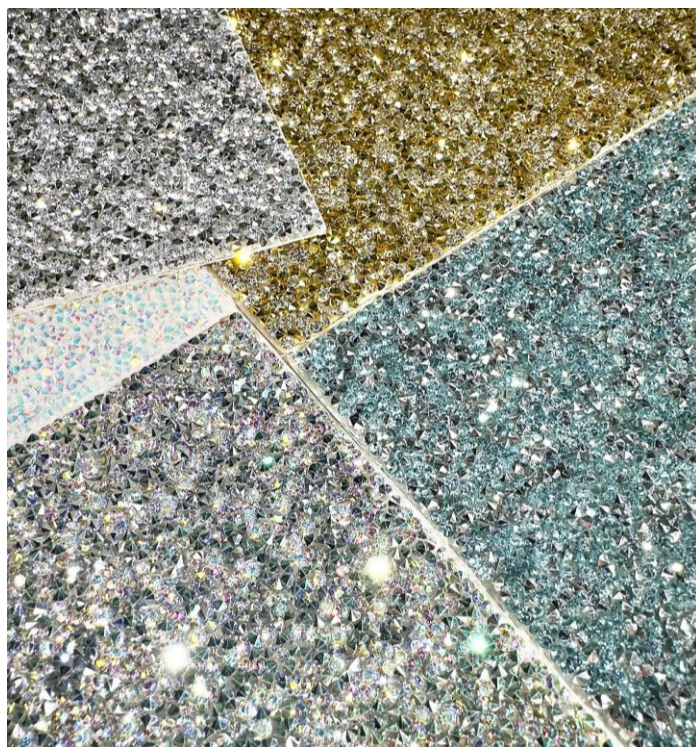

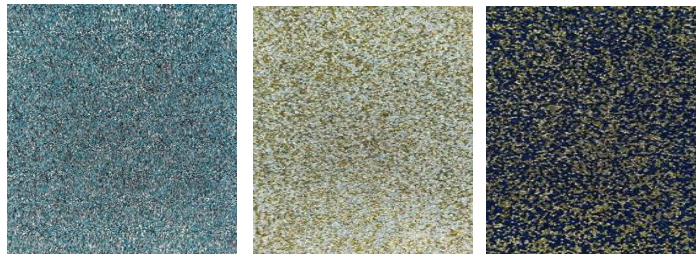

▪ Dazzling Brilliance for Iconic Spaces.

Diamond Mosaic is a premium decorative material made of high-refraction crystals or glass diamonds, featuring dazzling sparkle, durability, and moisture resistance. Ideal for feature walls, furniture accents, and commercial spaces, it offers customizable designs and easy installation, adding luxury and artistry to any project.

Product name: Diamond Mosaic

Product features:

- 1. Dazzling Diamond Brilliance:** AB facet cutting with 1.8+ refractive index (close to natural diamond)
- 2. 3D Light Interaction:** Prism structure creates dynamic rainbow reflections
- 3. Zero-Cut Design:** Standard modules fit common dimensions without cutting

ACRYLIC PLATE

08

▪ Crystal-Clear Strength. Limitless Creativity.

Acrylic is a high-performance transparent plastic with glass-like clarity (92% light transmittance) while being lighter and more impact-resistant than glass. Dubbed the "Queen of Plastics", it is widely used in advertising signage, architectural decoration, home design, and more, supporting versatile processing like cutting, engraving, and thermoforming.

Product Name: Acrylic Plate

Product Features:

- 1. Crystal-like Clarity:** 92% light transmittance, superior to regular glass
- 2. Lightweight & Impact-resistant:** 50% lighter than glass, 10x more impact-resistant
- 3. Excellent Weather Resistance:** 10-year outdoor use without yellowing, UV-8 rating
- 4. Color Variety:** 200+ color options in transparent/translucent/opaque

ICE PELLET PLATE

09

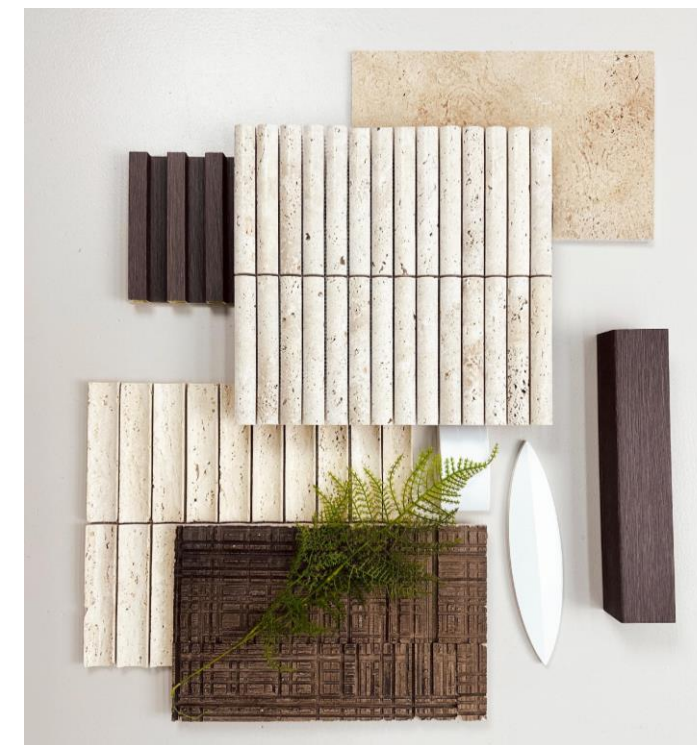

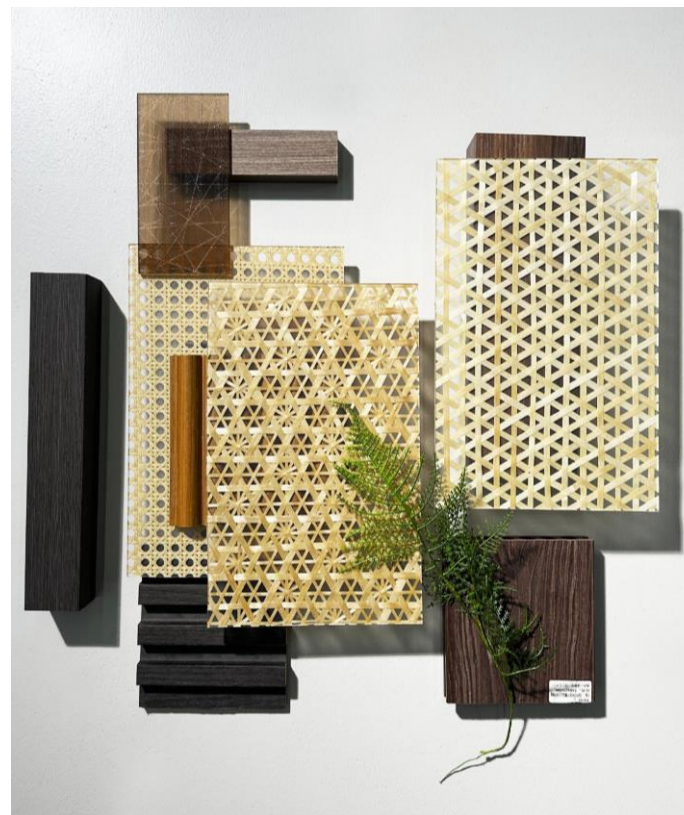

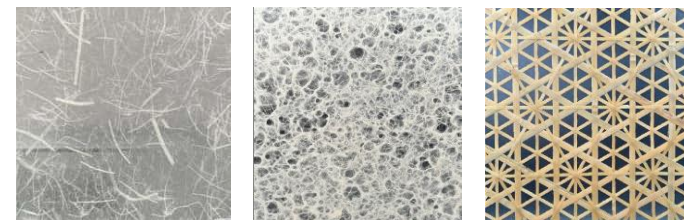

▪ Half the Weight of Glass. All the Clarity.

The raw material is exported food grade environmentally friendly transparent plastic. It is one half of the weight of glass, indoor can be used instead of glass, and the delivery is not afraid of breaking and other advantages.

Product Name: Ice Pellet Plate

Product Features:

- 1. Ultimate Transparency:** 95%+ light transmission, crystal-clear like ice
- 2. Anti-Yellowing:** Maintains 90%+ transparency after 10-year UV exposure
- 3. Lightweight & Safe:** 1/3 weight of glass, SGS non-toxic certified

STONE MOSAIC

18

▪ Stainless steel sheets

Stone Mosaic is a decorative material made by cutting natural stone into small pieces and assembling them into patterns. It features natural textures and unique aesthetics, ideal for walls, floors, and feature walls, adding a touch of luxury, vintage, or modern style to any space.

Product Name: Stone Mosaic

Product Features:

- 1. Natural Texture:** Each piece retains the stone's original grain and color, making every mosaic unique.
- 2. High Durability:** Resistant to pressure, wear, and corrosion, suitable for both indoor and outdoor use.
- 3. Design Flexibility:** Customizable colors, patterns, and layouts for personalized decor.
- 4. Eco-Friendly & Safe:** Free from artificial harmful substances, non-toxic, and odorless.

ELECTRIC BRICK

- **Electroplated Brilliance – Where Innovation Meets Infrastructure!**

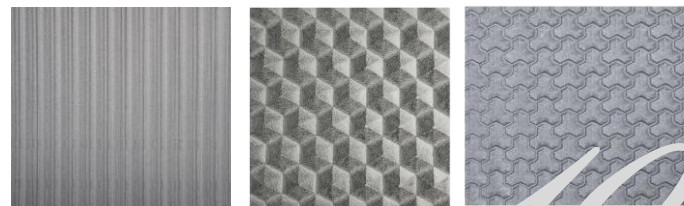

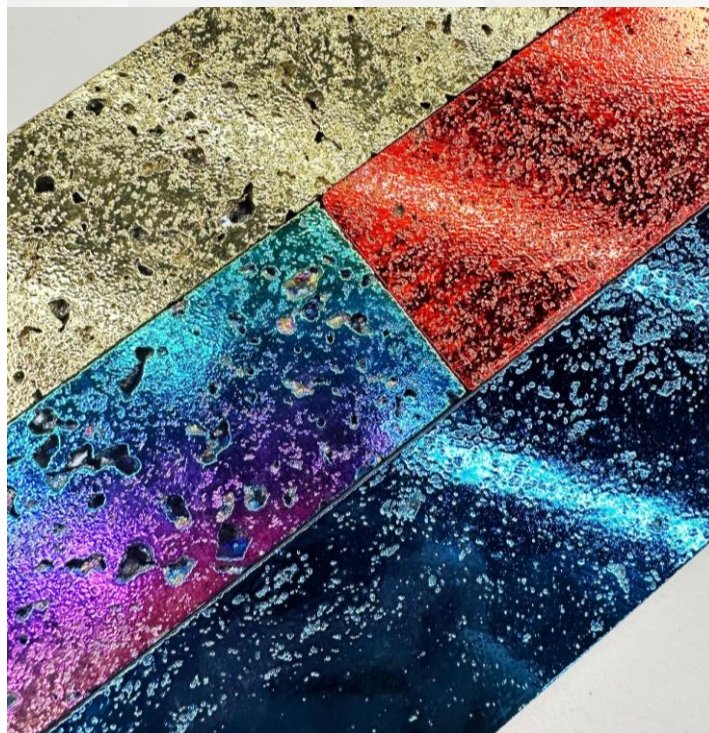

Electroplated tiles are metal plated on the surface of natural stone, using electrolytic process to deposit metal or alloy on the surface of the stone to form a metal plating. Highly polished, giving a metallic luster.

Increase the strength of the stone, improve the wear resistance of the product. Handmade, pieces are different.

Product Name:

Product Features: Electroplating Brick

1. Mirror Metallic Finish: Nanoscale electroplating achieves 98% reflectivity
2. Extreme Wear Resistance: 5x more scratch-resistant
3. Anti-Fingerprint: Special oleophobic coating reduces fingerprints by 90%

CEMENT DECORATIVE PANEL

- Raw Texture. Refined Design.

Cement Decorative Board, crafted from natural cement with minimalist design, balances raw texture and refined touch. Fireproof, moisture-resistant, and highly durable—ideal for walls, furniture, and art installations, perfect for industrial or wabi-sabi style spaces.

Product Name: Cement Decorative Panel

Product Features :

1. High Durability: Fireproof, moisture-resistant, and corrosion-proof, ideal for high-humidity environments
2. Lightweight Design: 60% lighter than traditional concrete, reducing transportation and installation costs.
3. Eco-Friendly & Safe: Zero VOC emissions, Some products contain recycled materials (LEED-compliant).
4. Versatile Applications: Can be cut and drilled for walls, ceilings, custom furniture, and more.

PU DECORATIVE PANEL

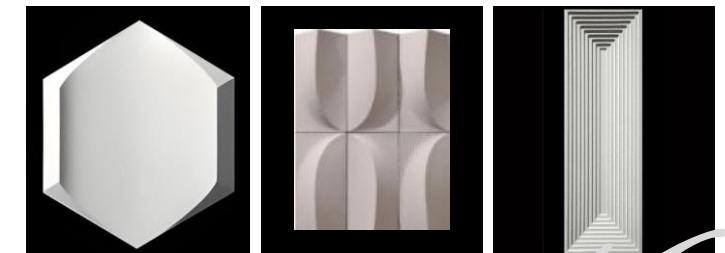

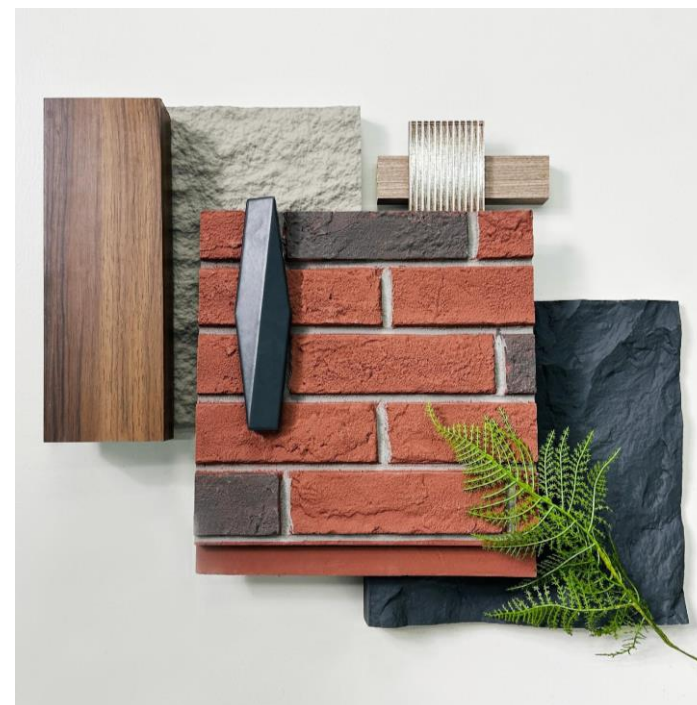

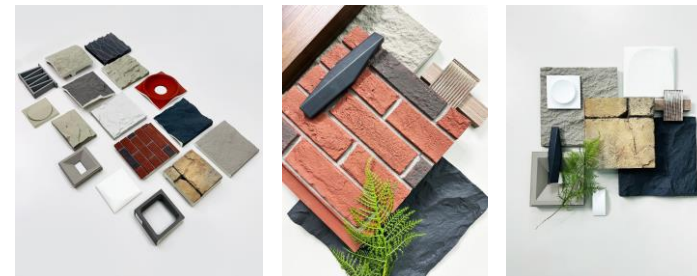

- The ideal choice for innovative home decoration

PU veneer with superior quality. The product is light and durable, heat insulation and low water absorption, easy to process and install. The product is energy saving and environmental protection, B1 fire prevention, heat insulation, moisture and anti corrosion. PU material is light, strong. Convenient for construction, high installation efficiency.

Product Name: PU Veneer

Product Features:

1. Lightweight & High Strength: Low density yet excellent load-bearing capacity, more durable than traditional materials
2. Easy Installation: Cuttable / glueable / paintable, adaptable to various installation methods Extreme Weather Resistance: UV-resistant, withstands extreme temperatures (-40°C~90°C), 10+ years outdoor lifespan

3D CEMENT BRICK

- **3D Cement Bricks — Where Depth Meets Design.**

3D cement brick is made of concrete UHPC cement as cementing material, sand and stone as aggregate, and is formed in the mould after mixing. After drying and demoulding, cement bricks are formed. 3D cement brick surface is delicate, three-dimensional feeling is super, a variety of colour styles, widely used in indoor background wall, milk tea shop door, club and so on.

Product Name: 3D Cement Brick

Product Features :

1. Modular Design: Standard 200×200mm units enable unlimited patterns
2. Quick Installation: Patented clip system triples installation speed
3. 3D Relief Effect: 5-15mm embossed depth creates dynamic light/shadow effects

ICE PELLET PLATE

15

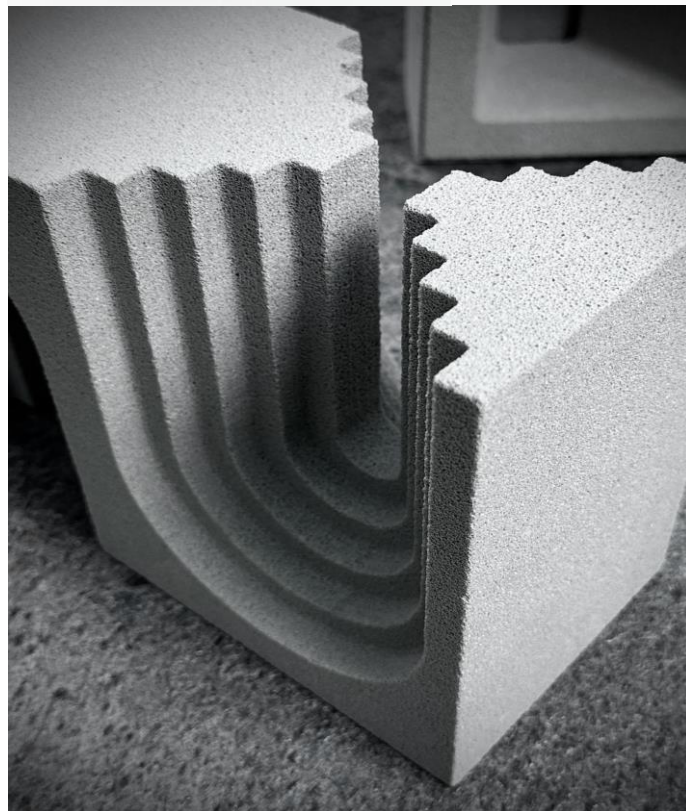

▪ Half the Weight of Glass. All the Clarity.

The raw material is exported food grade environmentally friendly transparent plastic. It is one half of the weight of glass, indoor can be used instead of glass, and the delivery is not afraid of breaking and other advantages.

Product Name: Ice Pellet Plate

Product Features:

1. Ultimate Transparency: 95%+ light transmission, crystal-clear like ice
2. Anti-Yellowing: Maintains 90%+ transparency after 10-year UV exposure
3. Lightweight & Safe: 1/3 weight of glass, SGS non-toxic certified

STAINLESS STEEL SHEET

12

▪ Strength you can trust, beauty you can see

Stainless steel sheets are metal plates rolled from stainless steel, featuring excellent corrosion resistance, high strength, and an aesthetically pleasing surface. Widely used in architectural decoration, industrial equipment, kitchenware manufacturing, and more, they are essential materials for modern engineering and design.

Product Name: Jade Glass

Product Features:

1. Superior Corrosion Resistance: Chromium-nickel alloy resists acid/ alkali/ salt corrosion, ideal for harsh environments
2. Extreme Temperature Resistance: Withstands -200°C-800°C without deformation
3. Aesthetic & Durable: Mirror/brushed/sandblasted finishes, maintains permanent luster

ALUMINUM FOAM

13

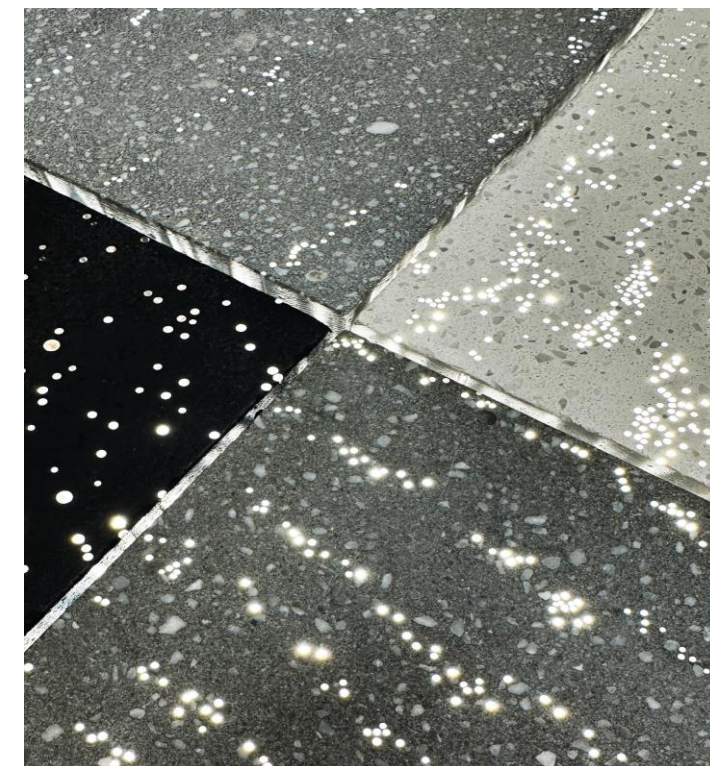

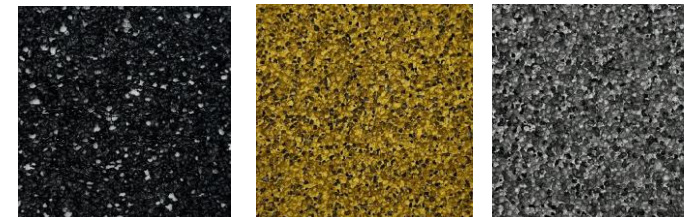

▪ Aluminum Foam: Strength in Every Pore.

Aluminum foam is a new type of material with a lightweight, porous structure that is made by introducing a gas or blowing agent into a molten aluminum alloy. Aluminum foam has a range of unique properties that have led to its use in a wide variety of applications.

Product name: Aluminum foam

Product features:

1. **Energy Absorption & Damping:** Unique porous structure absorbs 90% impact energy with excellent damping
2. **Fireproof & Heat Resistant:** Melting point 660°C, certified Class A fireproof
3. **Eco-Friendly & Recyclable:** 100% recyclable aluminum material, no harmful emissions

TRANSLUCENT CEMENT

14

▪ Transparent Cement: Let Light Shape Your Structure.

Transparent cement is a solid product processed. It is made of cement, aggregates, stones, sand, steel bars, etc., added with optical fibers, and finally formed into a solid board or brick shaped finished product. If there are special requirements, the shape and light source style can also be customized.

Product Name: Translucent Cement

Product Features:

1. **Lotus leaf effect:** Pervious to light concrete surface using Germany imported paint, paste the active ingredients can penetrate into cement base surface of wool stoma.
2. **Self-compacting high flow state**
3. **High flexural strength**
